Data Scientist

PROFESSIONAL SUMMARY

Results-driven Data Scientist with expertise in end-to-end analytics, machine learning, and AI-driven automation. Experienced in building Data Loss Prevention (DLP) systems, anomaly detection models, and scalable data pipelines. Strong proficiency in Python, data analysis, and business intelligence with a proven ability to improve operational efficiency and enable data-driven decision-making.

PROFESSIONAL EXPERIENCE

Data Scientist | TSIT Digital

Feb 2026 – Apr 2026

Client: SONY

Bengaluru

- Developed Data Loss Prevention (DLP) automation systems using Python, significantly reducing manual effort.
- Built anomaly detection models to identify abnormal incident spikes using statistical techniques.
- Integrated REST APIs for employee data enrichment, improving incident analysis accuracy.
- Processed Outlook/Exchange data using win32com for email intelligence extraction.
- Automated reporting using OpenPyXL and XlsxWriter with dynamic formatting and summaries.
- Designed risk scoring models for incident prioritization and decision-making.
- Implemented logging, exception handling, and modular architecture for scalable and reliable systems.

Subject Matter Expert – Data Science & AIML

Mar 2025 – Dec 2025

iNurture solution Pvt Ltd.

Bengaluru

- Mentored aspiring Data Scientists and ML Engineers, driving practical learning, problem-solving, and project-based implementation.
- Developed and deployed predictive models and automation solutions, improving operational efficiency by 25%.
- Built and optimized end-to-end ML pipelines using Python, SQL, and cloud platforms (AWS/Azure) for scalable solutions.
- Collaborated with cross-functional teams to design data-driven solutions and AI-based applications for real-world business problems.

Analyst – (sales team) Power BI / Salesforce

Nov 2024 – Mar 2025

BlitzScale Software Solutions Pvt Ltd.

Bengaluru

- Analyzed market trends and sales data, identifying high-potential segments that increased pipeline efficiency by 12%.
- Refined client segmentation strategies, boosting personalization and acquisition rates for new clients.
- Built and deployed forecasting models that improved revenue planning accuracy by 18%, aligning sales targets with market trends.
- Streamlined sales data visualization and reporting, enabling faster KPI tracking and data-driven decision making across leadership teams.

- Built **machine learning and AI-based models** to extract insights from complex datasets, driving better customer engagement and financial planning.
- Delivered **advanced analytics dashboards in Power BI and Excel** to improve visibility of balance sheets, profitability, and cash flows.
- Developed **SOPs and reporting automation**, reducing manual **effort by 20%** and improving data accuracy.
- **Mentored** junior analysts and supported adoption of **BI tools**, raising analytics maturity across the organi zation.

PROJECT

Data Loss Prevention (DLP) Automation & Efficiency Enhancement

- ◆ **Automation & Workflow**
 - Developed automation pipelines for DLP incident processing, reducing manual effort.
 - Designed scalable workflows for efficient incident lifecycle management.
- ◆ **Anomaly Detection**
 - Built anomaly detection models to identify abnormal incident patterns using statistical analysis.
 - Implemented data-driven monitoring for early risk detection.
- ◆ **API Integration & Data Enrichment**
 - Integrated REST APIs for real-time employee data enrichment.
 - Developed data pipelines to enhance contextual decision-making.
- ◆ **Email Intelligence**
 - Automated email parsing and metadata extraction using Outlook (win32com).
 - Extracted structured data for incident analysis and classification.
- ◆ **Reporting & Visualization**
 - Built automated reports using OpenPyXL/XlsxWriter with advanced Excel formatting.
 - Created dashboard-ready outputs for stakeholders.
- ◆ **Scalable Architecture**
 - Designed modular, scalable systems with logging and exception handling.
 - Ensured reliable and maintainable data pipeline architecture.

CORE KEY SKILLS

- **Programming:** Python, SQL,C,C++,Java.
- **Machine Learning & AI:** Machine Learning, Generative AI, Agentic AI, Predictive Modeling, Tensor Flow, PyTorch, NLP, Deep Learning.
- **Data Analysis:** Pandas, NumPy, Data Cleaning, Data Transformation, Testing, Boosting.
- **Visualization & BI:** Power BI, Tableau, Advanced Excel, Dashboarding.
- **Tools & Platforms:** Salesforce, Zoho CRM, AWS, Azure.
- **Concepts:** Data Pipelines, API Integration, Automation, Business Intelligence, Statistical Analysis, ML solutions.
- **Softskills:**Communication, Problem-Solving, Analytical Thinking,Team Collaboration,Presentation Skills,Business Understanding

EDUCATION

Master in computer application (Machine learning)

2021 – 2023

Centurion Univercity Of Technology And Management.
